

Monthly HANGAR FLYING Safety Meeting

Loss of Control is the number one (1) root cause of fatalities in both General Aviation (GA) and commercial aviation. Currently, in GA alone, there is one fatal accident involving loss of control every 4 days on average. Attend this informative safety briefing and learn what you can do to reverse this trend! Learn about the safety benefits of Angle of Attack (AOA) systems and how AOA indicators may help prevent loss of control in small aircraft because they provide a more reliable indication of airflow over the wing. Then, we will hear about a recent VFR flight down the Hudson River Corridor, complete with many photos and tips on how to do it safely. Free soft drinks and snacks courtesy of TRUE COURSE FLIGHT SCHOOL!

Directions: Meeting in the TRUE COURSE FLIGHT SCHOOL hangar.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
